BMIG (BMI AND GRADE) CALCULATOR

1. Project Background and Description

BMIG is a unique platform where concerned students can check / find there

- **BMI**. Body mass index is a value derived from the mass and height of a person. The BMI is defined as the body mass divided by the square of the body height

- **Grade cal**. grading in education is the process of applying standardized measurements for varying levels of achievements in a course.
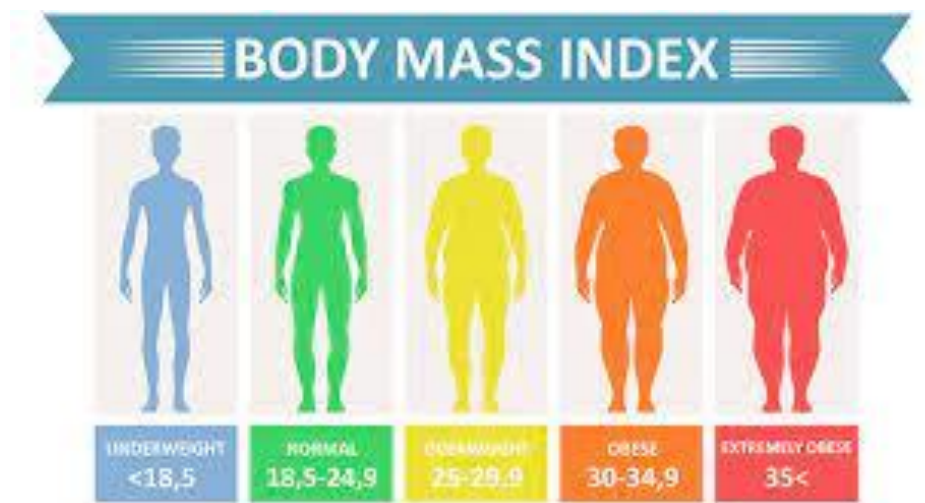

2. Project Scope

This project is designed for students only". Here, we'll check if user (student) is conscious of his health or his grades.

If the user doesn't enter correct credentials (username and password), we'll not give him access to either calculate his BMI or calculate his grades!
